

Standard Yellow Apricot No: 4

With an above-standard size (141-160 pcs/kg) and a competitive market price, one of the most widely traded balanced apricots on the world market.

Standard Yellow Apricot No: 4 (141-160 pcs/kg) is one of the most frequently traded, high-volume calibres in the dried fruit trade. Being neither too large nor too small, this ideal average size, with its easy bite-sized consumption and strong price advantage, finds demand in every segment from supermarket chains to the food industry.

- › Confectionery & Baking

The calibre (pcs/kg) and nutritional values in the table are based on Malatya apricot standards, industry practice and supply chain experience; exact values are confirmed by lot analysis. For serious wholesale purchase enquiries we consider your sample request; the sample fee charged is calculated over the retail reference unit price, and the courier/freight cost belongs to the buyer.
